

SPECIALISTS IN CRYOGENIC EQUIPMENT

insulated valves
designed to operate @B& at use and safe level"

All Vent Heaters
come with Cryogas's
renowned customer
service, from
conceptual design to
implementation, and
are backed by a one
year warranty.

Cryovent Exhaust Gas Heater is designed to fit on the bayonet outlet of a Cryogas Cryovent. When liquid in the piping system is constantly vaporizing, the vapor exiting the Cryovent outlet may cause condensation and frosting at the vent outlet. The cryovent heater provides a heated path by where the cryogenic gas is warmed to halt the creation of ice and condensation. This heater can either be plugged in or hard wired. This creates a safe environment while minimizing potential pipe strain which can be associated with a non-heated cryovent.

Vent Heater Specifications

Voltage

- 110 VAC
- 220 VAC

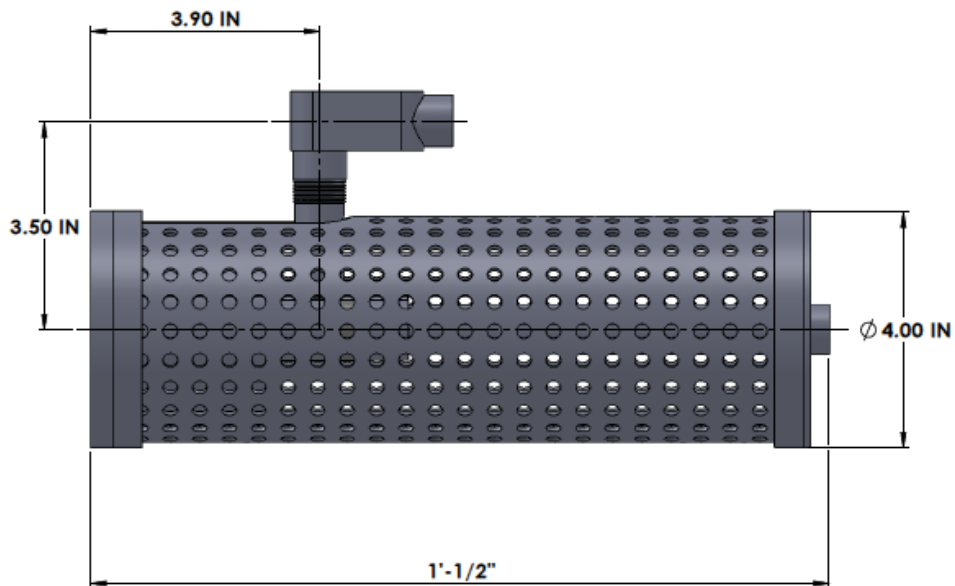

Power Connection

- Standard grounded plug
- Hard wired

Current

- 3 Amps
